THE SWEET WORLD OF BEES

Bees pollinate **1/3rd** of the world's crops! That includes:

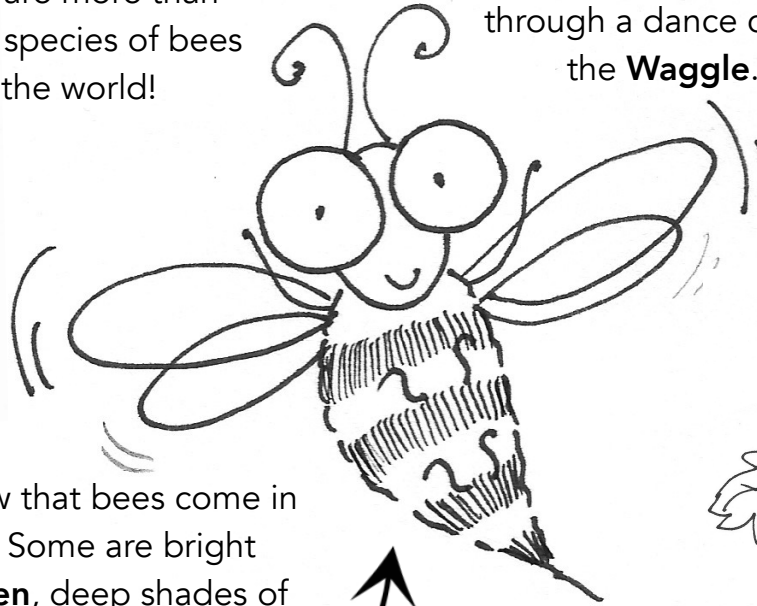

There are more than **20,000** species of bees in the world!

Bees communicate through a dance called the **Waggle**.

APPLES

One hive can make **30-100 pounds** of honey in a year!

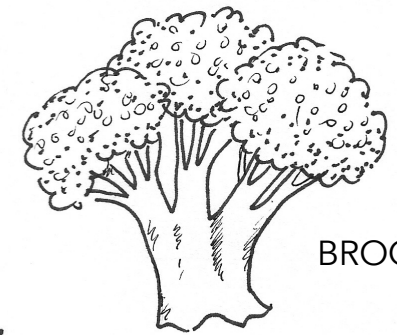

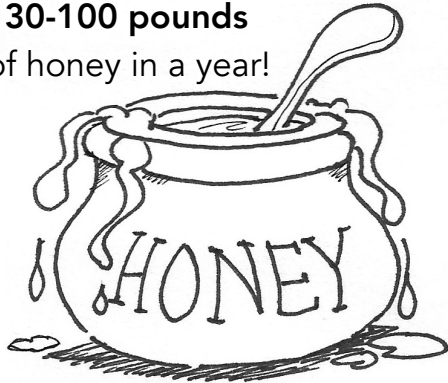

Did you know that bees come in all colors? Some are bright metallic **green**, deep shades of **blue**, **red** and **yellow**, or deep **brown** and **black**.

How will you color this bee?

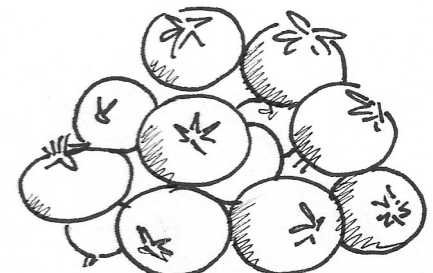

A bee can visit **5,000** flowers in one day!

PUMPKINS

BROCCOLI

BLUEBERRIES

Want to help native bee populations? Create a **"native pollinator" garden**! Some Maine perennials that bees enjoy include white meadowsweet, butterfly milkweed, and Jacob's ladder.
